Re: Residential Lead Water Service Line Replacement Program Now Open

Dear Homeowner,

The City Council passed a resolution adopting a Residential Lead Water Service Line Replacement Program on March 23, 2021. The goal of this program is to provide financial assistance to homeowners who replace their lead water service line. The program's intent is to offset a portion of the expense of updating a building's water service line to reduce the exposure to lead in water and to promote better health through clean water. This is a reimbursement program, in which the homeowners must first receive approval to take part in the program, prior to the replacement of the residential water service line. Improvements installed prior to approval are not eligible for reimbursement. Since this program has been adopted by the City Council, we are now accepting applications.

Please carefully review the attached [Residential Lead Water Service Line Replacement Program Guidelines and FAQ sheets](#). If you wish to apply to participate in this program, submit the attached form to the Engineering Department, by email to [pubworksenineering@ci.berwyn.il.us](mailto:pubworksenineering@ci.berwyn.il.us) or by USPS or in person at City Hall, 6700 W. 26th Street, Berwyn, Illinois 60402, or fax to 708-749-6593. Please check the City's website at <https://www.berwyn-il.gov/government/departamental-directory/traffic-services> for any updates on lead water service related items.

**To be eligible for reimbursement, do not replace any residential water service lines prior to receiving written approval of your application from our department.**

Please feel free to contact the Engineering Department at 708-749-6434 at any time with questions regarding this program.

Sincerely,

Engineering Department, City of Berwyn
